Bonds, Social Bonds

June 23, 2020

The Ford Foundation announced the pricing and sale of a \$1 billion aggregate principal Social Bond (taxable), the net proceeds of which will help support and strengthen nonprofit organizations hit hard by COVID-19 pandemic. This Social Bond is the first-ever such offering by a U.S. nonprofit foundation in the taxable corporate bond market. The foundation's bond offering includes 30-year and 50-year maturities, with \$300 million maturing in 2050 and \$700 million maturing in 2070 at a fixed rate of 2.415% and 2.815%, per annum, respectively.

"The low yields and the successful, rare, 50-year maturity achieved through the bond sale are a strong indication of investor confidence in the Ford Foundation's stature in the private foundation space, its mission and investors' appetite for securities with a positive ESG and, in particular, social impact. The 50-year bond maturity is a first of its kind for a U.S. private foundation," said Sally Bednar of Wells Fargo Securities.

Initiative to Accelerate Giving – Policy Proposals

- 15-year DAFs: Limit donor advisory privileges to 15 years from the date of the donation to the DAF.
- Limit charitable deduction for illiquid assets to the cash received after sale rather than appraised value.
- Postpone income tax charitable deduction until DAF is distributed.
- Liquidate DAF within 10 years of donor's death.
- Remove salary and travel expenses of family members from qualified distributions.
- Treat grants from private foundations to DAFs as non qualifying distributions.

5

Initiative to Accelerate Giving – Policy Proposals (cont'd)

- Eliminate the foundation excise tax any year a foundation's payout is 7% or greater.
- Eliminate the foundation excise tax for time-limited private foundation with a life of 25 years or less.
- Increase amount of nonitemizers deduction, consider imposing a 1-2% AGI floor for giving, and continue to exclude gifts to DAFs and private foundations.
- Add new enforcement and reporting requirements
