Effect of the Proposed Rulemaking:

The CPRA established a new agency, the California Privacy Protection Agency, to implement and enforce the CCPA. (§ 1798.199.10.) The Agency is directed to adopt regulations to further the purposes of the Act, including promulgating regulations on 22 specific topics. (§ 1798.185.) The proposed regulations primarily do three things: (1) update existing CCPA regulations to harmonize them with CPRA amendments to the CCPA; (2) operationalize new rights and concepts introduced by the CPRA to provide clarity and specificity to implement the law; and (3) reorganize and consolidate requirements set forth in the law to make the regulations easier to follow and understand.
